# Bird shooting in Hungary

*Hungary is one of the most popular hunting destinations in Europe. Thanks to its beautiful nature and well-organized management offers a unique experience for each hunter.*

*The history of bird shooting goes back to the period of the Austro-Hungarian Empire and till now it keeps its high level attracting guns from all over the world.*

*This hunting territory is located 100 km far from Budapest airport and 170 km far from Vienna airport.*

*The hunting ground has 5800 hectares hunting fields. There are many lakes in and around the hunting area and they are a popular resting place for wild geese. In the autumn and winter, 25-50,000 wild geese usually stay in the area. Hunting only takes place in the morning, when they leave the lakes to graze in the fields. The ideal time for wild goose hunting is cloudy, foggy or windy weather.*

*That is why it is recommended to combine wild goose hunting with semi-wild duck and/or pheasant hunting, so the hunters can enjoy a more complete hunting day.*

## Proposal of itinerary
