

DRIVEN HUNT IN SLOVAKIA

HIGH QUALITY ORGANIZATION

FREE RANGE 12000 HECTARES VERY RICH IN GAME

3 HUNTING DAYS AND 4 NIGHTS IN HOTEL WITH ALL MEALS

HUNTING AREAS AND DRIVEN HUNT ORGANISATION

The hunting days will take place in outstanding free range very rich in games. The total area is around 12 thousand hectares. The hunt will be for all wild boars (piglets, yearlings, sows with weight up to 80 kg before gutting, tuskers with no limit on weight and trophy value) + other non-trophy games (fallow deer, mouflon and European red deer). Two long drives are usually planned per day (two and a half hours each), with a commitment to add a third if the first two do not yield satisfactory results. The experience of many years has shown that two long drives a day will guarantee a much better result than three shorter drives a day. This is due to the fact that the areas from which the animals are driven towards the hunters are very large and have a particular conformation (in part of the area the animals are driven down from hilly and wooded areas). As a result, the use of an adequate number of beaters and dogs gives the hunters many opportunities to shoot over a long period of time during each of the two drives, and allows them to reach a very reach daily game pack. Hunting days start with breakfast around 7am and a staff briefing to explain to the hunters how the hunt will be conducted and safety procedures. After breakfast, the hunters move into the hunt area for the first drive. This is followed by a snack lunch (soup or goulash, small dessert and tea) usually served in the hunting area to optimise the time available for hunting. The second drive usually ends around 4 pm. The duration of the first two drives (especially the second on) will be reduced if a third drive is considered. Hunting days are managed according to old local hunting traditions, including the presence of hunting horn players.

OUTCOME OF HUNTING IN RECENT YEARS

The high standard organization of the driven hunt and the abundance of game in the area has always ensured very good hunting results in the past, with hunters returning home satisfied. Below is the result of a hunt in November 2024 which is a good representation of the results usually achieved.

3 days hunt with 21 very experienced hunters

119 animals hunted in 3 days, around 30 % wild boars. 70 % fallow deer does and fawns, red deer hinds and calves, mouflon sheep and lambs.

Below you find pictures from this driven hunt 2024.

In the past, the number of wild boars in this part of Slovakia used to be much higher, often accounting for over 60% of the total number of animals hunted during a driven hunt. In recent years, however, this figure has rarely exceeded 40%. If the percentage of wild boar falls below 30%, a discount is applied, as explained below. Thanks to the excellent organization, which has been greatly appreciated by our clients, excellent hunting days are ensured with a 30% percentage of wild boar and the extraordinary abundance of other games, especially red deer and fallow deer.
