HUNTING AREAS

The hunting district – all free range areas size totally around 40 thousand hectares and it is very rich with big game and small game. About 20 % of hunting ground is made up of woodlands where the game can find a place to stay and rest in the scattered forest plots, reed plots and lake systems. The owner of the area pay highlighted attention to the harmony of crop production and game farming which provides a calm hunting-field rich in game and possibilities for the guests wishing to hunt and rest at the same time. Around 400 roe deer are hunted each year. Around 100 roe bucks a year, amongst which over 400-450 grams trophies are not rare. For the protection of roe deer population the managing of the areas carry out trapping throughout the year for predator control. Besides these measures they pay great attention to preserve roe kids during cutting and harvest. Among the outstanding trophies these areas can boast a record 678 gr.
